UZAIR MOHAMMAD

Full-Stack Engineer | Final-Year CS Student

Chhatrapati Sambhajinagar | +91-8208183855 | programmeruzair@gmail.com | linkedin.com/in/uzair-md | github.com/uzairProg | uzair.codes | LeetCode

PROFESSIONAL SUMMARY

Final-year Computer Science student who likes building full-stack and AI-powered products end to end. Currently interning on a live recruitment platform and previously built a retail POS system as a freelance project, alongside hands-on experience with LLMs and RAG using LangChain and LangGraph. Also picked up 12+ hackathon wins along the way for fast prototyping under pressure.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C++, Python, SQL
Frontend: React.js, HTML, CSS, Tailwind CSS, Radix UI, React Router, Framer Motion, Recharts
Backend & Databases: Node.js, Express.js, Flask, FastAPI, REST APIs, MongoDB, Firebase
AI & ML: LangChain, LangGraph, Retrieval-Augmented Generation (RAG), NLP, Vector Databases (Qdrant)
Tools & Testing: Git, GitHub, Postman, Selenium, Docker, JWT Authentication, Socket.io
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

INTERNSHIP & FREELANCING

Full-Stack Developer Intern, FAEDA *Saudi Arabia (Remote) | Jul 2026 - Present*

Project: FAEDA WAZAYIF, a recruitment and career platform | Live: faeda-wazayif-1.onrender.com

- Building responsive, reusable UI components in React and TypeScript for FAEDA WAZAYIF, including full English/Arabic localization with RTL and LTR layouts.
- Working across the stack with React, TypeScript, Python, and Flask on candidate profiles, job discovery, applications, and university verification.
- Set up authentication and role-based access so job seekers, companies, universities, and admins each get the right experience.
- Collaborated directly with the CEO on product planning, UX decisions, and testing.

Freelance Full-Stack Developer, DripCheck (Retail Inventory & POS System) *Jul - Sep 2026*

Live: dripcheck-beige.vercel.app

- Built the frontend for a full-stack POS and inventory system using React, TypeScript, Tailwind CSS, and Radix UI, including a barcode (Code-128) checkout flow with real-time cart sync over Socket.io.
- Built an analytics dashboard with Recharts visualizations for revenue, inventory, and product performance, plus exportable Excel/PDF reports.
- In daily use by 3 staff and 2 admins, processing 90-100 sales a day, now expanding to a second store.
- Implemented JWT-based authentication with role-based access for staff and admin accounts, backed by a layered backend architecture (controllers, services, models).

PROJECTS

SvaramAI: AI-Powered Chandas (Sanskrit Meter) Identification Platform

- Built a React.js frontend and FastAPI backend for an AI platform that uses LLMs and RAG to identify Sanskrit poetic meters, with LangChain, LangGraph, and Qdrant for retrieval.

HAWK: OEM Vulnerability Detection & Alerting Tool

- Built a cybersecurity platform (Node.js, Python, MongoDB, React) that collects vulnerability data from multiple sources and uses NLP to extract and organize security information, with REST APIs for processing, search, and real-time alerts across 200+ records.

AWARDS & ACHIEVEMENTS

- Google Solution Challenge, Top 106, Team Triversal
- Smart India Hackathon 2025 (SIH), Finalist
- Ideathon 2.0, Mumbai, 3rd Prize, awarded by the Vice President of India, C. P. Radhakrishnan
- CIH 2.0, Nagpur, 1st Prize
- 12x additional national and inter-university hackathon wins, plus 75+ DSA problems solved on LeetCode

EDUCATION

B.Tech in Computer Science and Engineering, Deogiri Institute of Engineering and Management Studies

Chhatrapati Sambhajinagar | Graduation Year: 2027 | CGPA: 7
