UZAIR MOHAMMAD

Applied AI & Full-Stack Engineer | *Final-Year CS Student*

Chhatrapati Sambhajinagar | +91-8208183855 | programmeruzair@gmail.com | linkedin.com/in/uzair-md | github.com/uzairProg | uzair.codes | LeetCode

SUMMARY

Applied AI and full-stack engineer who ships LLM products to real users. Builds RAG systems with LangChain, LangGraph and vector search, and contributed to an AI assistant now live across 30+ Maharashtra Police stations. Built a POS system solo that runs a retail client's daily sales (90–100 a day) and won their follow-on project. 12+ hackathon wins; project awarded by the Vice President of India.

EXPERIENCE

Freelance Full-Stack Developer, DripCheck *Client project, solo | Jul 2026 – Present*

- Scoped requirements with the store owner and delivered a **POS and inventory system solo, end to end**; in daily use by **5 staff and admins at 90–100 sales a day**, now rolling out to a second store.
- Built barcode (Code-128) checkout with **real-time cart sync over Socket.io**, JWT role-based access, an analytics dashboard and Excel/PDF reports on a layered Node.js/Express/MongoDB backend.
- **Won the client's follow-on project:** an e-commerce platform with two-way POS inventory sync, checkout stock holds, Razorpay payment verification, invoicing and Shiprocket courier booking.

Full-Stack Developer Intern, FAEDA *Saudi Arabia (Remote) | Jul 2026 – Present*

FAEDA WAZAYIF, a recruitment and career platform | Live: faeda-wazayif-1.onrender.com

- Ship features across React, TypeScript, Python and Flask: candidate profiles, job discovery, applications and university verification, with **role-based access for four user types**.
- Delivered full **English/Arabic localisation** (RTL/LTR) and work directly with the **CEO** to turn business requirements into shipped features.

APPLIED AI PROJECTS

TAPAS KIRAN: AI Assistant for Maharashtra Police *Team project | Live in production*

- Contributed to a **RAG-based knowledge assistant** that gives officers quick access to SOPs, legal provisions and investigation guidelines using **vector embeddings and semantic search**.
- Deployed across **30+ police stations with 250+ daily officer logins**; built on React, Node.js, Express, MongoDB and REST APIs.

SvaramAI: LLM + RAG Sanskrit Metre Identification *FastAPI · LangChain · LangGraph · Qdrant*

- Built a FastAPI backend that identifies the metre (chandas) of Sanskrit verses by combining LLMs with **RAG-based semantic search** over a Qdrant vector store and LangGraph workflows.
- Added **multi-LLM support** and prompt engineering for accurate, explainable results, with a React frontend.

HAWK: NLP Vulnerability Detection & Alerting *Awarded by the Vice President of India*

- Built a real-time platform that scrapes OEM security advisories and uses an **NLP pipeline** to extract, correlate, de-duplicate and **risk-score** vulnerabilities from unstructured text, with REST APIs for search and real-time alerts across 200+ records (Node.js, Python, MongoDB, React).

TECHNICAL SKILLS

AI & ML: LLM integration, RAG, embeddings & vector search (Qdrant), LangChain, LangGraph, prompt engineering, structured outputs (Pydantic), NLP, Gemini

Languages: Python, JavaScript, TypeScript, C++, SQL · **Core CS:** DSA, OOP, DBMS, OS, Computer Networks

Full-Stack: React, Node.js, Express, FastAPI, Flask, REST APIs, Socket.IO, Tailwind CSS, Radix UI, Recharts

Data, Infra & Integrations: MongoDB, Firebase, Docker, GCP, Vercel, Git, Postman, Selenium, JWT/RBAC, Razorpay, Shiprocket API

AWARDS & ACHIEVEMENTS

- **12+ hackathon wins**, including CIH 2.0 Nagpur (1st), Zentrix / HackTheGap 2.0 (1st) and Ideathon 2.0 Mumbai (3rd, **awarded by the Vice President of India**, C. P. Radhakrishnan)
- **Smart India Hackathon 2025**, National Finalist · **Google Solution Challenge 2026**, Top 106 (Allocare, Gemini + Vertex AI)

EDUCATION

B.Tech in Computer Science and Engineering, Deogiri Institute of Engineering and Management Studies

Chhatrapati Sambhajinagar | Graduation Year: 2027 | CGPA: 7
