PROFESSIONAL SUMMARY

Final-year Computer Science student who likes building full-stack and AI-powered products end to end. Currently interning on a live recruitment platform and previously built a retail POS system as a freelance project, alongside hands-on experience with LLMs and RAG using LangChain and LangGraph. Also picked up 12+ hackathon wins along the way for fast prototyping under pressure.

EDUCATION

B.Tech in Computer Science and Engineering, Deogiri Institute of Engineering and Management Studies
Chhatrapati Sambhajinagar | Graduation Year: 2027 | CGPA: 7

TECHNICAL SKILLS

Languages: C++, Python, JavaScript/TypeScript, SQL
Full-Stack: React.js, Node.js, Express.js, Flask, FastAPI, REST APIs, Flutter
AI & ML: LangChain, LangGraph, Retrieval-Augmented Generation (RAG), NLP, Prompt Engineering, Vector Databases (Qdrant)
Databases & Cloud: MongoDB, Firebase, GCP, Docker, Git, Linux
Other: JWT Authentication, Role-Based Access Control, Socket.io, Arabic RTL Localization

EXPERIENCE

Full-Stack Developer Intern, FAEDA *Saudi Arabia (Remote) | Jul 2026 - Present*
Project: FAEDA WAZAYIF, a recruitment and career platform | Live: faeda-wazayif-1.onrender.com

- Working on FAEDA WAZAYIF, a platform that connects job seekers, companies, universities, and hiring teams.
- Building features across the stack with React, TypeScript, Python, and Flask, including candidate profiles, job discovery, applications, and university verification.
- Set up authentication and role-based access so job seekers, companies, universities, and admins each get the right experience.
- Worked on English/Arabic support with RTL and LTR layouts, and collaborated directly with the CEO on product and UX decisions.

Freelance Full-Stack Developer, DripCheck (Retail Inventory & POS System) *Jul - Sep 2026*

- Built a full-stack POS and inventory system (React, Node.js, Express, MongoDB) for a retail store, covering product catalog, purchases, sales, and returns.
- Built a barcode (Code-128) checkout flow with real-time cart sync over Socket.io and PIN-based staff login.
- Implemented JWT-based authentication with role-based access for staff and admin accounts, backed by a layered backend architecture (controllers, services, models) for maintainability.
- Built a returns and damaged-goods workflow with refund handling, plus an analytics dashboard with exportable Excel/PDF reports.

PROJECTS

SvaramAI: AI-Powered Chandas (Sanskrit Meter) Identification Platform

- Built an AI platform using LLMs and RAG to identify Sanskrit poetic meters, using LangChain, LangGraph, and Qdrant with a FastAPI backend.

HAWK: OEM Vulnerability Detection & Alerting Tool

- Built a cybersecurity platform (Node.js, Python, MongoDB, React) that collects vulnerability data from multiple sources and uses NLP to extract and organize security information, with REST APIs for processing, search, and real-time alerts across 200+ vulnerability records.

AWARDS & ACHIEVEMENTS

- Google Solution Challenge, Top 106, Team Triversal
- Smart India Hackathon 2025 (SIH), Finalist
- Ideathon 2.0, Mumbai, 3rd Prize, awarded by the Vice President of India, C. P. Radhakrishnan
- CIH 2.0, Nagpur, 1st Prize
- HackTheGap 2026, Chhatrapati Sambhajinagar, 1st Prize
- 12x additional national and inter-university hackathon wins, plus 90+ DSA problems solved on LeetCode
